

12" Aluminum Traffic Signal Head

FEATURES

- Heavy-duty die-cast aluminum alloy
- One-piece, completely weather-proof housing with hinged door
- “Building block” configuration for total interchangeability
- Allows coupling with 8-inch signals
- Lenses available in polycarbonate or glass
- Wing-nuts allow tool-free maintenance
- Accepts standard visors and backplates
- Accepts 60-150 watt incandescent bulbs or LEDs
- Exceeds ITE requirements
- Available in a variety of colors

Trafficware 12-inch Aluminum Traffic Signals are designed to meet the most demanding requirements. The housing is a one-piece, die-cast, and completely weatherproof component with a hinged door constructed of the same material. Wing-nuts provide tool-free maintenance and the quality hardware is built to last for years. Each lamp is contained in its own singular housing so that any combination of balls, arrows, or colors can be achieved without ever removing any of the hardware. The housing will also accept standard LED lamps. An assortment of visors may be attached to meet every application.
