Trafficware
Engineered by **N** Naztec

WEB.now Module

WEB.now is a website delivery mechanism for ATMS.now data, providing the public with access to real-time traffic information. By thoroughly integrating with the underlying data that drives ATMS.now, no additional data setup is required. Furthermore, WEB.now can be configured to display as much or as little information as necessary. The WEB.now interface can be viewed with most devices that have Internet access capabilities.

Capabilities

- Presents public traffic information in full GIS-based interface
- Displays congestion, incidents, video, and temperature layers
- Includes a report engine for publishing real-time traffic count reports
- Links to future ITS partners, such as neighboring agencies
- Available in Standard GIS or Microsoft Bing™
- Web servers can be hosted and maintained by Trafficware
- Integrates contact system
